

NEWS RELEASE

Lark Chapin Named EVP of Business Development at International Alliance Group

HOUSTON, TEXAS (September 8, 2009) . Triten Corp. announced today that Lark Chapin has been named executive vice president, Business Development, for International Alliance Group (IAG), a Triten subsidiary. Chapin will report to Gary Baumgartner, executive vice president and chief operating officer.

For five years prior to joining IAG, Chapin worked for Lummus Technology, a CB&I company, where she was vice president of the Refining Technology Business group. There she was responsible for promoting the company's proprietary FCC, Delayed Coking, Alkylation and Distillate hydrotreating technologies.

Prior to joining Lummus, she worked for 13 years at Stone & Webster Engineering, a Shaw company, where she held several positions before being promoted to vice president of Technology.

Chapin has been a frequent presenter at industry conferences such as NPRA, JPI and AiChe. Her papers have been published in numerous trade journals, including *Hydrocarbon Processing*, *Chemical Engineering Progress*, *Oil and Gas Journal* and *Hydrocarbon Technology International*.

About Triten Corp.

Based in Houston, Texas, Triten Corp. is a private holding company with deep roots in the energy, steel and heavy construction industries. Founded in 1946, the company includes two operating subsidiaries, International Alliance Group (IAG) and Triten Alloy Products Group, both global leaders in their respective industries.
